Ahmed Awsaf

+8801632663362 | officialawsaf@gmail.com | github.com/AhmedAwsaf | Niketan, Dhaka

Software Engineer and Data Analyst with around 2+ years of experience building production-grade APIs, front-end interfaces, data pipelines, and automated workflows. Proficient in Python, TypeScript/React, and SQL, with hands-on experience applying AI quality assessment and data benchmarking in a US health-tech environment. Driven to use technology for social good – eager to contribute to mission-led platforms that improve outcomes for vulnerable communities.

EXPERIENCE

Commure Jan 2026 – Present
Growth Operations Analyst Tejgaon, Dhaka

- Designed and built an **automated QA pipeline** in Python and SQL to evaluate clinical notes generated by an ambient AI scribe product, replacing manual review workflows and reducing QA workload by **30%**.
- Conducted comparative analysis between **AI-generated notes and physician-signed notes** to flag discrepancies and ensure high-fidelity clinical documentation.
- Currently benchmarking **site-level revenue data** against Commure's RCM product to validate performance and pricing assumptions, partnering closely with Growth and Sales teams.

Masroors PLLC Jul 2023 – Nov 2025
Full-Stack Developer (Remote) Chandler, AZ (Remote)

- Developed backend services and APIs using **FastAPI and PostgreSQL** to support dynamic web functionality across production systems.
- Designed **SQL-based reporting solutions** and ensured data consistency across production systems, supporting real-time data access for legal case workflows.
- Built and enhanced **front-end interfaces** using React/Next.js with a focus on performance and responsive design.
- Implemented authentication, access control, and secure data handling practices in a fully remote agile team.

FPP Consultancy Jul 2022 – Apr 2023
Full-Stack Developer Niketan, Dhaka

- Built an **offline-capable examination management system** using **Node.js, MySQL, and vanilla JavaScript**, with local network servers handling all backend operations.
- Optimized **MySQL** database performance and ensured reliable deployment across a **local network environment** with strict accuracy and uptime requirements.
- Designed intuitive user interfaces and performed rigorous testing and debugging across the full stack.

PROJECTS

Barobi Design | *Next.js, PostgreSQL, Express.js, GCP* | barobidesign.com.bd

- Built a full-stack e-commerce and inventory management platform with **RESTful APIs** and optimized PostgreSQL schemas, handling **500+ SKUs and concurrent transactions** across a live storefront.
- Integrated third-party payment, authentication, and cloud services and deployed to **Google Cloud Platform**.

Business General AI | *Streamlit, Pandas, Plotly, Groq API, Scikit-learn* | github

- Developed a comprehensive business analytics platform featuring AI-powered insights, interactive dashboards, and predictive forecasting, built with Streamlit and integrated with modern data science libraries.
- Implemented natural language data querying, automated content generation, and conversational AI interfaces using Groq and OpenRouter APIs for intelligent data analysis and user interaction.

BossClub | *Kotlin KTX, Jetpack Compose* | github

- Built an Android app for IntraHacktive 1.0 hackathon, placing **Second Runner-Up** out of competing teams.

Landing Page & Admin Dashboard | *Next.js, FastAPI, PostgreSQL* | masroors.com

- Designed and deployed a production landing page and admin dashboard for Masroors PLLC with **NeonDB and JWT** authentication and real-time data handling.

MortGame | *Unity, C#, Android SDK* | github

- Developed and shipped an Android game using **Unity and C#**, handling game logic, physics, and mobile deployment.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL, Kotlin, C#
Frontend: React, Next.js, shadcn/ui, Tailwind CSS
Backend: FastAPI, Django, Express.js, REST APIs
Databases: PostgreSQL, Supabase, MySQL, MongoDB, NeonDB
Tools: Git, GCP, Docker, Linux, Playwright, BeautifulSoup, Selenium

EDUCATION

BRAC University Aug 2021 – Sep 2025
B.Sc. in Computer Science and Engineering — CGPA: 3.87 / 4.0 ***(Highest Distinction)*** Merul Badda, Dhaka

AWARDS & ACCOLADES

BRACU Intrahacktive 1.0 Hackathon — Second Runner-Up 2024
Android app built with Kotlin KTX and Jetpack Compose

EXTRA-CURRICULAR

Director 2019 – 2021
SCHOMUN, Scholastica

President 2019 – 2021
Scholastica Music Club, Scholastica
