Ahmed Awsaf

+8801632663362 | officialawsaf@gmail.com | github.com/AhmedAwsaf | Niketan, Dhaka

Software Engineer and Data Analyst with around 4 years of experience building production-grade APIs, data pipelines, and automated workflows. Proficient in Python and experienced applying it to AI quality assessment in a US health-tech environment, with a strong foundation in FastAPI, PostgreSQL, and cloud deployment. Driven to use technology for social good eager to contribute to mission-led platforms that improve outcomes for vulnerable communities.

EXPERIENCE

Augmedix (Commure US) Jan 2026 – Present
Data Operations Analyst Tejgaon, Dhaka

- Automated **AI note quality assessment** pipelines using Python, SQL, and workflow orchestration tools, reducing manual review time by an estimated **40%** and improving audit scalability.
- Conducted comparative analysis between **AI-generated notes and physician-signed notes** to identify discrepancies and ensure high-fidelity clinical documentation.
- Developed data-driven feedback loops through workflows to **validate AI output quality**, ensuring outputs met stringent clinical standards and compliance requirements.

Masroors PLLC Jul 2023 – Nov 2025
Full-Stack Developer (Remote) Chandler, AZ (Remote)

- Developed backend services and APIs using **FastAPI and PostgreSQL** to support dynamic web functionality across production systems.
- Designed **SQL-based reporting solutions** and ensured data consistency across production systems, supporting real-time data access for legal case workflows.
- Built and enhanced **front-end interfaces** using React/Next.js with a focus on performance and responsive design.
- Implemented authentication, access control, and secure data handling practices in a fully remote agile team.

FPP Consultancy Jul 2022 – Apr 2023
Full-Stack Developer Niketan, Dhaka

- Built an **offline-capable examination management system** using **Node.js, MySQL, and vanilla JavaScript**, with local network servers handling all backend operations.
- Optimized **MySQL** database performance and ensured reliable deployment across a **local network environment** with strict accuracy and uptime requirements.
- Designed intuitive user interfaces and performed rigorous testing and debugging across the full stack.

PROJECTS

Barobi Design | *Next.js, PostgreSQL, Express.js, GCP* | barobidesign.com.bd

- Built a full-stack e-commerce and inventory management platform with **RESTful APIs** and optimized PostgreSQL schemas, handling **500+ SKUs and concurrent transactions** across a live storefront.
- Integrated third-party payment, authentication, and cloud services and deployed to **Google Cloud Platform**.

BossClub | *Kotlin KTX, Jetpack Compose* | github

- Built an Android app for IntraHacktive 1.0 hackathon, placing **Second Runner-Up** out of competing teams.

Landing Page & Admin Dashboard | *Next.js, FastAPI, PostgreSQL* | masroors.com

- Designed and deployed a production landing page and admin dashboard for Masroors PLLC with **NeonDB and JWT** authentication and real-time data handling.

DX Ball Game | *Python, OpenGL* | github

- Recreated the classic DX Ball game in **Python using OpenGL**, implementing real-time graphics rendering and collision physics from scratch.

MortGame | *Unity, C#, Android SDK* | github

- Developed and shipped an Android game using **Unity and C#**, handling game logic, physics, and mobile deployment.

SKILLS

Languages: Python, SQL, JavaScript, Kotlin, C#
Python: FastAPI, Django, Playwright, BeautifulSoup, Selenium
Databases: PostgreSQL, MySQL, MongoDB, NeonDB
Stack: REST APIs, Next.js, React, Express.js
Tools: Git, GCP, Docker, Linux

EDUCATION

BRAC University Aug 2021 – Sep 2025
B.Sc. in Computer Science and Engineering — CGPA: 3.87 / 4.0 ***(Highest Distinction)*** Merul Badda, Dhaka

Scholastica Aug 2019 – Aug 2021
Cambridge O & A Levels — GPA: 5.0 ***(High Honors)*** Uttara, Dhaka

RESEARCH

Digital Twin Simulation for Traffic Infrastructure Management in Bangladesh | *Thesis*

- Developed a prototype traffic simulation for infrastructural improvement in Bangladesh using **YOLO v11** and the **Unity** game engine.
- Created a framework for traffic management tailored to **irregular Bangladeshi traffic patterns**.
- Published to the **Ayesha Abed Library Repository** , BRAC University.

AWARDS & ACCOLADES

BRACU Intrahacktive 1.0 Hackathon — Second Runner-Up 2024
Android app built with Kotlin KTX and Jetpack Compose

EXTRA-CURRICULAR

Director 2019 – 2021
SCHOMUN, Scholastica

President 2019 – 2021
Scholastica Music Club, Scholastica
